IMPORTANT SAFETY INFORMATION: READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

⚠ WARNING - Seizures

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.
- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.
- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions

Altered vision

Eye or muscle twitching

Involuntary movements

Loss of awareness

Disorientation

To reduce the likelihood of a seizure when playing video games:

1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

WARNING - Repetitive Motion Injuries and Eyestrain

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms or eyes during or after play, stop playing and see a doctor.

WARNING - Battery Leakage

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the correct directions. Insert the negative end first. When removing batteries, remove the positive end first.

Story

The sky is the clearest blue. The lush-growing primeval forest bursts with life. Normally quiet, today the jungle is buzzing with excitement.

And no wonder, for the Jungle Jam festival that will determine the true hero is finally about to take place!!

In the Jungle Jam arena, Cranky Kong and Donkey Kong discuss storing away the winner's medals that will be presented to the victors in order to prevent them from being stolen.

Just at that moment, there is a flash of light from high up in the skies, and King K. Rool appears in an airborne carriage. The precious medals are gone!

Without the medals, there can be no Jungle Jam. The question is, can Donkey Kong get the winner's medals back safely?

Controls

This game is played in a slightly different way than previous action games. Most actions can be performed using just two buttons, the L Button and the R Button. You can move, jump, and even attack with just these two buttons! Pegs and panels play the most important roles in the actions Donkey Kong performs. You'll find floating pegs and panels on the game screen. By grabbing and swinging on them, you'll be able to dodge and jump enemies and progress through the game. See pages 13-16 for a more detailed description of the various different actions.

About Saving

DK: King of Swing is an auto-save game. In Adventure mode, your progress is saved automatically each time you complete a level, and in Single-Player Jungle Jam mode your record is saved when the competition ends. There is no save function in Multiplayer Jungle Jam mode.

Adventure

Map Screen

If you choose Adventure on the mode-selection screen, after the introduction and Cranky's lesson, you'll enter the map screen. From here, you'll be able to choose the world and the level you want to play. When you start a new game, only the first world (Jungle World) will be available. As you proceed through the game, you'll be given more worlds and levels to choose from.

Use the + Control Pad or the L and R Buttons to choose the level you want to play. Confirm your selection with the A Button.

Boss Stage

Once you have completed every level on one map, the Boss Stage will appear. To move on to the next map, destroy the boss by completely draining his strength gauge.

Status Screen

The Status Screen is displayed when you press START on the map screen. This screen allows you to check up on how many medals you have retrieved and how many Crystal Coconuts you have. Choose Return to Map or press the B Button to return to the map screen, or choose Quit to return to the mode-selection screen.

Medals

There are three kinds of medals: bronze, silver, and gold, one of which is hidden somewhere in every level. Find them all so that the competition to crown the jungle hero will finally take place! Every time you get a complete set of medals (gold, silver, and bronze), there will be a surprise!

Crystal Coconuts

There is one Crystal Coconut hidden in every level. Collect them all and things could go well for you!

The medal and Crystal Coconut you have found in a level are displayed next to the level name on the map screen or at the top-left of the game screen.

The Game Screen

Each level is divided in several sub-levels. Your goal is to climb up to the exit by destroying enemies and steering clear of obstacles. Try also to collect all the bananas you see. They will be very useful!

Pause Screen

The Pause screen is displayed when you press START during the game. Choose Return to Game to continue playing, Return to Map to exit the level, or Quit to return to the mode-selection screen.
